

8th Annual Conference on Energy Arbitration & Dispute Resolution in the Middle East and Africa

13 June 2025

About

Over 30-years of experience of providing dispute resolution services to parties in the MEASA region

We administer arbitrations under to the DIAC Arbitration Rules, which are flexible and suitable for all types of arbitrable disputes.

We regularly act as an appointing authority and administer arbitrations conducted under to the UNCITRAL Rules. We also provide other ADR services including mediation and conciliation services.

We conduct an international program of events and courses.

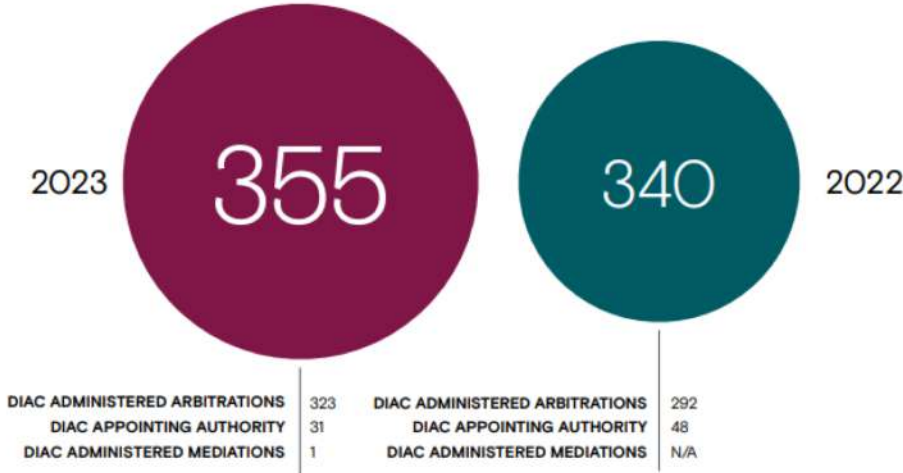

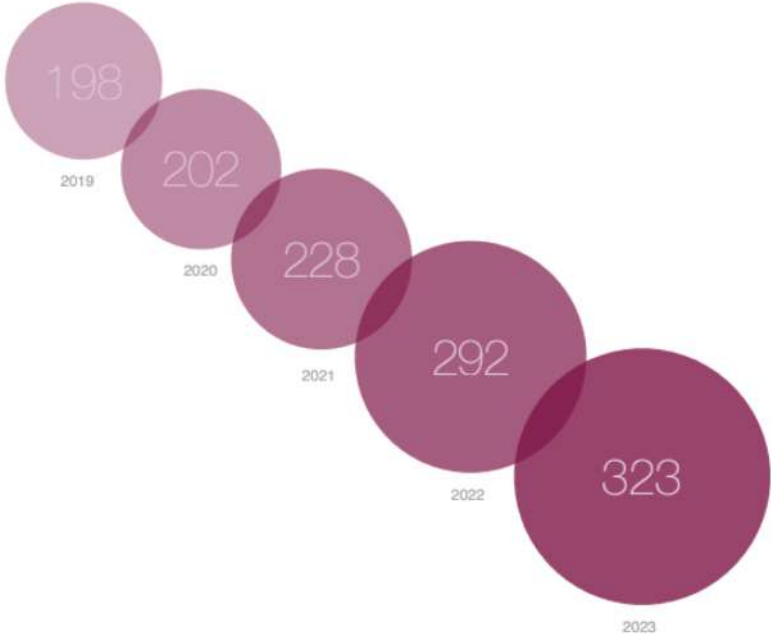

The region's largest arbitral institution, committed to excellence, efficiency, and diversity

Statistics

Performing increasingly well year-on-year, with scope for future growth and improvement

2024
AMOUNT IN DISPUTE

AED 9.7B

More and more parties are using the Centre and trusting it to deal with their most valuable disputes

The DIAC Arbitration Rules 2022

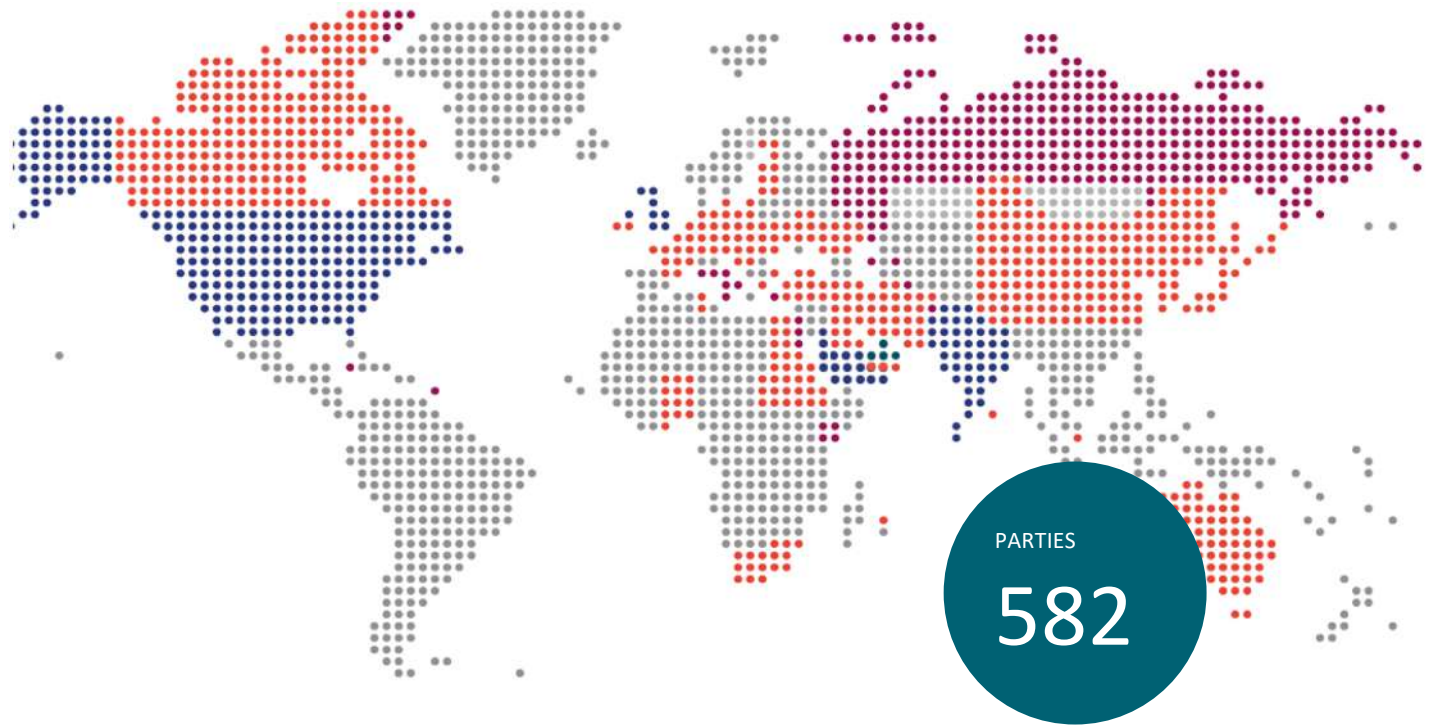

- A modern set of arbitration rules suitable for energy disputes
- Focus on efficiency and expeditiousness
- Procedural tools for multi-party and multi-contract arbitrations
- Default initial DIFC seat
- Use of technology and virtual hearings

Statistics

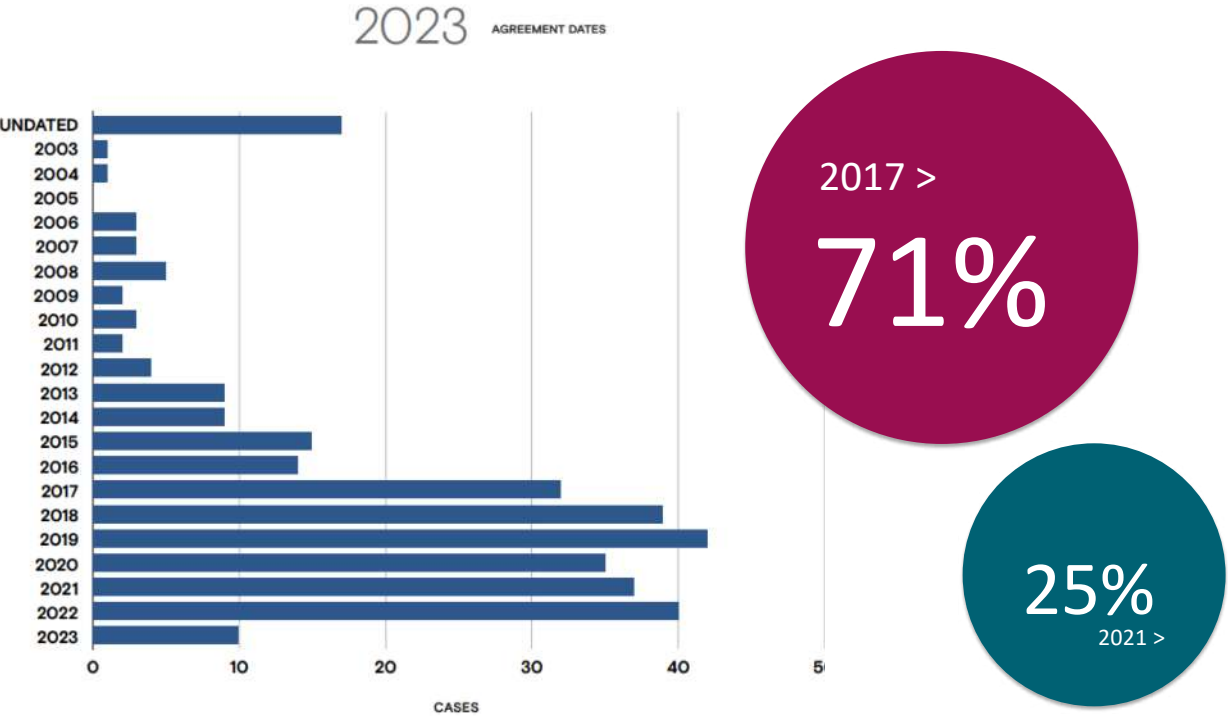

Assisting individuals, businesses, and governments from all over the world

Serving parties doing business in and through the MEASA region

Almost three quarters of contracts concluded within the past 6 years, and 25% concluded in 2021 or later

Reaffirming that parties continue to recognise the Centre’s unique proposition

- Disputes in the construction and real estate sector make up the majority of the Centre's caseload (59% of all administered arbitrations in 2023 and 58% in 2024)
- Disputes in the energy sector represented ca. 10% of administered arbitrations registered in 2024
- The majority were oil and gas disputes, while the remainder concerned power generation and distribution and mining and natural resources
